VitrA

Create a sense of
wellbeing with beautiful,
life-enriching bathrooms.

Welcome to our Designer Collection, created in collaboration with world- renowned, forward-thinking designers.

Showcasing the very best in bathroom design and utilising the latest technology, our exclusive designer ranges will elevate your bathroom experience to a whole new level.

Innovation and creativity drives product development. We pioneer the latest technology in our smart-app flush plates (page 236), use inventive engineering for superior hygiene in the Rim-ex range (page 240), apply our VitrA Hygiene as standard to all ceramic pieces (page 232) and draw on our 50-year heritage and expertise to develop unique glazes and manufacturing processes for outstanding quality.

But to be truly innovative means being responsible for future generations. We are committed to reducing non-renewable resources, not only during manufacture, but also in product development to ensure power and water conservation for every VitrA product. We call it Blue Life (see page 255).

Ultimately, our mission is to elevate your everyday bathroom experience into something beautiful, relaxing and life-enriching. So, step inside these pages, we've got everything you need.

We have **innovation,**
design and **creativity**
at our heart.

Our award-winning designs
are the result of our unique
collaborative approach.

Meet our award-winning designers

Arik Levy

Inspired by his time living and working in Japan, Arik's award-winning minimalist designs are exceptionally versatile.

Voyage range

Claudio Bellini

Based in Milan, Claudio fuses the organic beauty of nature with modern urban architecture to create fresh, futuristic designs.

Equal range

Ross Lovegrove

Ross Lovegrove is internationally renowned for his ability to create organic, sculptural shapes using sophisticated technology and materials.

Istanbul range

Christophe Pillet

A celebrated international designer, Christophe's designs are true to his modern style: timeless and elegantly simple.

Memoria range

Sebastian Conran

British designer Sebastian, brings his unique multidisciplinary approach to bathroom accessories.

Eternity range

Matteo Thun & Partners

This world-renowned, Milan-based studio, headed up by Matteo Thun, has a deep understanding of the latest materials, resulting in designs that are truly original.

Water Jewels range

NOA

Multi-award-winning, German design studio NOA are renowned for a focus on practicality, resulting in clean, clutter-free designs.

M-Line range

Pentagon Design

The human-centric approach of Finland-based Pentagon Designs results in accessible, adaptable and timeless styles.

Nest range

Indeed

With an experience-led focus and collaborative design approach, German-based Indeed produces simple, yet innovative solutions.

Memoria Infinit

Characterised by its simplicity, this range features washbasins and bathtubs that are made from mineral cast with an ultra-thin edge, designed to compliment the slender grey and chestnut furniture. By harnessing new techniques and materials, this range is almost a work of art in its own right, creating a sense of poise and balance.

For complete technical specifications for all our products, please visit vitra.co.uk

Manufactured by using a combination of natural stone powder and polyester resin, mineral cast produces a beautiful finish that is easy to clean and warm to the touch.

Left – Rectangular countertop bowl, 80cm, Infinit Mineral Cast £664 (89005)

Page 204

Choosing your shower system

Choosing the right shower system is one of the most important aspects of your bathroom. However, we know it can be overwhelming with so many aspects to consider. To keep things simple, we have created this step-by-step guide.

Step 1

Decide between a built-in or wall-mounted shower mixer, depending on the type of wall you have (cavity or solid)

Cavity wall

For a cavity wall you can choose between a built-in or a wall-mounted shower mixer. Built-in shower mixers create a minimalist look, opening up more space under the showerhead. Built-in shower mixers must be used with a concealed shower valve, either V-Box (see page 188), Minibox (see page 190) or Aquaheat (see page 200).

Solid wall

For a solid wall, the common solution is a wall-mounted shower mixer for its versatility, ease of fit and range of different styles.

Step 2

Choose your showerhead and/or hand shower

We have a wide range of stylish and practical showerheads and hand showers to match our bath, shower and basin mixers. From traditional to modern, round to square, powerful to water-saving, you can find one that perfectly matches the other elements of your bathroom design. See page 194 for our showerhead and hand shower options.

Step 3

Adding a bath to your bathroom equation?

You'll need a diverter to enable the flow of water to be switched from one outlet to another, such as the showerhead to the bath. Our range of diverters come in styles and finishes that match our mixers to give you a complete look. These are shown on page 192.

Alternatively for our complete shower systems see page 204

Shower sprays

From kick-starting your day to winding down at its end, we've got the perfect shower experience to match your mood. Below are a number of different spray options, from soft and gentle to strong and energising.

Type of shower mixer

The mixer controls the flow of water, similar to the tap on a basin.

Manual shower mixers

Our manual showers allow you to adjust both the temperature and flow rate allowing a high level of temperature control through the valve.

Thermostatic shower mixers

Our thermostatic showers allow you to enjoy a shower at the precise temperature you want, whilst ensuring it is sustained throughout your shower. Carefully mixing the hot and cold water supply, the thermostatic shower mixer recognises changes to water pressure or temperature, so if a tap is used, a bath run or toilet flushed elsewhere in your home, your shower will remain at your chosen temperature.

Why a thermostatic shower?

- Perfect for busy households, the consistency in temperature prevents the risk of sudden and unsafe water temperature changes
- Water and energy consumption is reduced with the sustained temperature, lowering your bills
- You can find the exact water temperature that gives you the most relaxing and enjoyable shower experience, and return to this temperature every time you shower
- With our 38° safety buttons, the water will never exceed this temperature unless the button is pressed – ideal for those with young children.

Our thermostatic showers are marked with the above symbol.

Built-in thermostatic shower mixers – V-Box (1- or 2-way)

V-Box offers complete flexibility to fit any bathroom design. It enables three water outlets (bath, hand shower and/or showerhead) and can be used with a range of square or round thermostatic built-in mixers. For 3-way showers (bath spout, hand shower and showerhead), select a 1-way thermostatic shower mixer and 3-way diverter – see page 192 for our diverters. V-Box can be trimmed to fit a 77mm wall depth which is standard in the UK and is compatible with our thermostatic shower mixers listed below.

Aquaheat shower kits

Our Aquaheat shower kits come with a thermostatic shower mixer, a showerhead and a hand shower. They also incorporate a water-saving button which ensures the flow of water is controlled in a way that prevents unnecessary water consumption, as well as a Cool Touch feature to prevent scalding.

Superior-hygiene, rimless WC pans

Innovation, design and creativity drive product development.

At our Innovation Centre, leading architects, designers and engineers collaborate to bring new and exciting ideas to life, to push the boundaries of bathroom design via the development of new technologies and materials.

Smart technology in everyday products

Our latest generation V-Care Smart Toilets (p234), combine the functionality of a toilet with the personal hygienic benefits of a bidet, fully customisable and remote-controlled to create the ultimate bathroom experience.

Alternatively, the Aquacare shower toilet (p238) benefits from an integrated and mechanically operated bidet function, as well as complete ease of installation, while our unique Rim-ex rimless toilet design (p240) promotes effortless hygiene and beautiful clean lines.

VitrA Clean

A surface finish that makes VitrA sanitaryware products incredibly easy to care for. This special glazing process increases surface tension so the water flows easily across the surface. All that's needed to keep the basins clean is a wipe with a damp cloth and the use of a mild detergent, making cleaning easier and helping to keep your bathroom looking its best. VitrA Clean finish is on a variety of basins including the Outline range.

VitrA Hygiene

A unique glazing process developed by VitrA that prevents germs multiplying. From washbasins to WCs, bidets to urinals, products produced with our VitrA Hygiene technology offer superior cleanliness throughout the product's lifetime. VitrA Hygiene is applied as standard to all ceramic products.

Greener living

We are committed to reducing non-renewable resources, not only during manufacture but also in product development, to ensure power and water conservation for every VitrA product.

The VitrA Smart Panel (p236) syncs with your phone via a dedicated app, putting you in complete control of your water usage. Its latest sensor technology creates our most hygienic and efficient flush ever.

In addition, all our flush plates (p242) release exactly the right quantity of water, helping you to monitor and conserve usage in one simple action.

Finally, our concealed cisterns (p246) or wall-hung frames (p248) are the hidden partner in the design of your bathroom, allowing you to protect that other precious resource – your space.

For more information about our commitment to innovation and the environment, visit vitra.co.uk

Origin flush plate, White £153 (740-1600) V-Care Comfort WC £2,200 (5674B003-6104) Accessories from the Origin range (see page 214).

V-Care

The streamlined Comfort remote control enables you to use the extensive range of features all at the touch of a button, including seat opening and closing, adjustable spray, water temperature and drying options.

Ergonomically designed with concealed plumbing and electronic connections for easy installation, the toilet will seamlessly integrate into any design theme.

The combination of being wall-hung and having a rimless Rim-ex bowl (see page 240) makes the toilet hygienic and easy to keep clean.

Features and benefits:

- Oscillating and pulsating jet options
- Multiple washing options
- Self-cleaning jet nozzle
- Adjustable drying temperature
- 5 toilet seat temperatures
- Remote seat opening and closing
- Automatic air purification for a fresher bathroom
- Bespoke gender-specific washing options
- De-calcification feature to prevent limescale
- Energy-saving mode

Smart panels

Using the latest digital sensor technology we've created the most hygienic and efficient toilet flush available.

As the digital home evolves, VitrA has combined smart technology with water-saving design in a modern and elegant flush plate that is compatible with VitrA 742 and 748 frames.

V-Care Smart Panel app

The Smart Panel system can be synced to the owner's mobile phone through VitrA's app, allowing the user to flush and view usage data for their toilet remotely. The app's regular reporting allows households to see their weekly water usage and identify how they can be more efficient. It also relays local water, power and drainage announcements to aid better management of flushing systems.

Flush with success

VitrA's Smart Panel has three flushing options – a full flush, half flush and a periodic flush – allowing the user to have control over water usage. Designed with hygiene in mind, the new periodic flush mode can be set to regularly wash out the bowl, minimising the risk of dirt and stains accumulating, keeping waste pipes clean. An auto-flush mode is also available, supplying the optimum volume of water according to each flush.

Family-friendly features

For families, the smart flush plate can be locked as a safety precaution for children.

Easy-clean, durable glass panel, in high gloss black.

Aquacare shower toilet

Developed by the Vitra Design and Innovation Team, Aquacare is a bidet and toilet in one, offering a refreshing, clean and hygienic bathroom experience. No electrical connections are required as the water is controlled via standard plumbing methods.

Available in the Sento and M-Line ranges, the toilets feature soft-closing seats and our hygienic Rim-ex bowl (see page 240), and is also available with a Vitrus glass concealed cistern (see page 248). When installing an Aquacare WC there is no additional equipment or preparation required for installation.

Aquacare wall-hung WC pan, Rim-ex integrated thermostatic stop valve **£668 – 7672B003-6204**

(Including slim toilet seat, soft-closing and thermostatic stop valve)

See page 76 for more details

238

Increased hygiene

The bidet receives water from the mains supply and the non-return valve features an air break to prevent contaminated water from the pan travelling back through the system, thus increasing the level of hygiene. Fully compatible with the EN1717 regulation which protects against the pollution of drinking water.

Beautifully designed

The Aquacare technology is hidden within the pan so it looks like a regular toilet and will integrate with any bathroom design. A soft-close seat is included with all models and includes our Rim-ex bowl, with no hidden rim for a more hygienic toilet that is easier to clean and stays cleaner for longer.

Thermostatic control

The M-Line Aquacare toilet offers a thermostatic feature to ensure a consistent water temperature, to a maximum of 38° to prevent scalding. This is controlled via a stop valve mounted on the side of the toilet.

Features and benefits

Three models available:

- Sento Aquacare
- M-Line Aquacare
- M-Line Aquacare with integrated thermostatic stop valve
- Wall-hung
- Rim-ex toilet bowl
- Soft-close seat
- Backflow prevention
- Single bidet spray cleaning function
- Simple to install

Quick and easy to install

Aquacare comes as a complete set. Included is a toilet with a pre-assembled and integrated air breaker and a soft-closing seat. No additional equipment or preparations besides water installation are required.

If maintenance is required, access is easy.

One simple click removes the Aquacare cover located below the toilet seat.

Sento

Aquacare wall-hung WC pan, Rim-ex bidet function **£480 – 7748B003-6202**

Rim-ex toilets

Rim-ex harnesses the latest in toilet bowl design. With a rimless, smooth internal pan that eliminates anywhere for germs and dirt to accumulate, the toilet that stays cleaner for longer and actively resists dirt build up.

Tests prove Rim-ex is 95% more hygienic than standard toilet pans* and it is much easier to clean – as there are no ledges you have complete visibility of the bowl. The unique design of the pan incorporates a water diverter to direct the flush around the bowl, which is easily removed for cleaning.

240

* Tests undertaken by the Akdeniz University, Turkey, show VitrA Rim-ex toilet pans are easier to clean and 95% more hygienic compared to standard toilet pans.

Designer Collection

Vitrus glass concealed cisterns

The Vitrus glass cistern and frame is a unique solution to update your bathroom without having to create a false wall to hide your toilet cistern.

Available in your choice of black or white, with chrome sides, Vitrus is easy to install and is designed with a large cover opening for easy maintenance and is compatible with all VitrA wall-hung and back-to-wall toilets, including Aquacare.

Wall-hung frames

VitrA’s frame systems are crucial to any modern bathroom, supporting and holding wall-hung WCs firmly in place without the need for expensive structural building work.

Whatever your project needs, VitrA’s range of frames offers you complete flexibility. The reduced height frame is perfect when space is at a premium or the room has a sloping roof or low window. Both the slim- and regular-sized frames can be used in solid, stud and double-stud wall scenarios and are both available with a choice of flushing volumes.

248

*Check against our full range of wall-hung frames for WCs, urinals, bidets and washbasins at vitra.co.uk

Need an alternative to a wall-hung frame? Our Vitrus glass concealed cisterns (page 246) for wall-hung and back-to-wall WCs can be used with any wall type, removing the need to create a false wall to hide the frame.

Regular wall-hung frame,
floor fixation **£277**

3/6 litre – 742-4800-01
2.5/4 litre – 742-4800-02

H: 1100-1270mm W: 490mm

Slim wall-hung frame,
floor fixation **£312**

3/6 litre – 748-4800-01
2.5/4 litre – 748-4800-02

H: 1125mm W: 535mm

Slim wall-hung frame,
double floor fixation **£500**

3/6 litre – 748-5850-01
2.5/4 litre – 748-5850-02

H: 1125mm W: 535mm

Strength and stability guaranteed

VitrA's wall-hung
frames are subjected
to rigorous reliability
and performance
testing at VitrA's
production facilities.

For optimal performance it is recommended wall-hung Rim-ex pans are used with a full height frame and at 3/6 litre flushing setting
For optimal performance it is recommended that reduced-height frames are used with standard, non-rim-ex, wall-hung WC pans

For horizontal drainage connection for all wall-hung frames & cisterns, please order 436448YP and 437274YP

For complete technical specifications for all our products, please visit vitra.co.uk

For urinals

Urinal installation frame,
floor and wall fixation
£116 – 780-3800
H: 1120mm W: 500mm P: 110-190mm

For bidets

Bidet installation frame,
floor and wall fixation
£106 – 780-5800
H: 1120mm W: 500mm P: 110-190mm

For washbasins

Washbasin and built-in mixer
installation frame, floor and wall fixation
£126 – 780-2810
H: 1120mm W: 500mm P: 110-190mm

Sustainability & accreditations

We're driven by our commitment to a sustainable future and the efficient use of water is one of our top priorities. We recognise our responsibility as a leading manufacturer of bathroom products to spearhead the water-saving movement having achieved the target set of reducing our own water consumption by 4% between 2017 and 2020.

We are also devoted to developing products and technologies that enable our customers to save water in their own homes. From aerators to eco-friendly cartridges, our innovative water-saving features mean you can save water while not compromising on design.

The European Water Label

The European Water Label is a government initiative put in place to empower consumers with important information on the water and energy use of bathroom products.

With sustainability at our core, the vast majority of our products fall under the top water consumption band (Class A, using 5 litres or less of water).

WRAS

WRAS (Water Regulations Advisory Scheme) has been approved as compliant with the Water Supply (Water Fittings) Regulations and Scottish Byelaws. All WRAS-approved products undergo rigorous mechanical and water quality testing that ensures the product will keep water supply clean and free from contamination.

To see the full list of our WRAS-approved products, please visit vitra.co.uk/about-us/sustainability

Adjustable cartridges

Some of our mixers come with adjustable cartridges that limit the maximum heat and flow from the tap, which in turn can save up to 60% waste. Our water- and energy-saving products are marked throughout with these symbols.

Water-saving

Energy-saving

Aerators

Aerators sit at the end of taps and add streams of air into the water flow. Water-saving and energy-saving, aerators significantly reduce the amount of water used while maintaining high water pressure. By directing water into one single downward flow, aerators also create a smoother flow and reduce splashing. Our ranges with aerators are marked throughout with the following symbols.

Water-saving aerator

Swivel aerator

Coin-slot aerator

Our water-saving aerators use significantly less water while maintaining a strong flow of 5 litres per minute.

Our swivel aerators allow you to change the direction of the water flow easily, meaning you can reach all areas of the washbasin.

Our coin-slot aerators can be effortlessly removed with the use of a coin, making it easy to clean the threaded aerator.

Water pressures

Water pressure, measured in bars, describes the strength of water flow through a pipe. When choosing your bathroom brassware, it's important to understand the water pressure in your water plumbing system. Whether it's a gravity, combination boiler, pump-assisted or mains high pressure system (ask your installer if you're unsure), identifying your system is key to finding a product that will give the best possible performance.

The minimum water pressure requirements for each product (low, medium or high) are marked in the brochure. Most products will suit any water system, however, the high pressure products are designed to work with high pressure systems for maximum pressure. Equally, if you have low water pressure, there are lots of products that will work for you.

Low (below 0-0.4 bar)

Medium (0.4-1.0 bar)

High (above 1.0- above bar)

We are committed to reducing the use of **non-renewable resources** in the production process.

Blue Life

Evolution stems from being adaptable to change. As the climate and the needs of our clients change, our ethos as a company evolves. In 2017, we initiated Blue Life, our pledge to greener production.

Since the Blue Life initiative began, we are now using 35% less water than before and have reduced energy consumption in our ceramic kilns factory by 15%. But this is just the beginning of what we are striving for.

We are taking this initiative to our products. Our 2.5/4ltr WC pan has been engineered to use up to 60% less water per flush than a standard design and our brassware is manufactured with adjustable pins for you to have control over water usage.

By choosing a Vitra product, you are contributing to saving the world's natural resources.

Our pledge to the future

- Continue the use of non-renewable resources in the production process.
- Develop products that promote power and resource conservation.
- Make significant investments towards boosting eco-efficiency.

Guarantees

Furniture and mirrors	2 years	Wall-hung frames and concealed cisterns	5 years [†]
Sanitaryware	10 years	Acrylic baths	25 years
Toilet seats	2 years	Bath panels	2 years
V-Care shower toilet	2 years	Brassware	10 years [†]
Aquacare bidet function	2 years	Shower systems	5 years [†]
Flush plates (excluding infrared panels)	5 years	Accessories	5 years
Infrared and electronic products	2 years	Complementary parts (waste set & waste cover)	5 years

If a product fails due to a manufacturing fault, VitrA will offer a free replacement or replacement parts. If a product is not available, VitrA will offer an alternative to the same value.

[†]Replacement only for working parts - non transferable

Disclaimer
