

## TECEdrainpoint S plastic drains

The modular system – compact, individual, versatile

**TECE:**

Intelligent housing technology

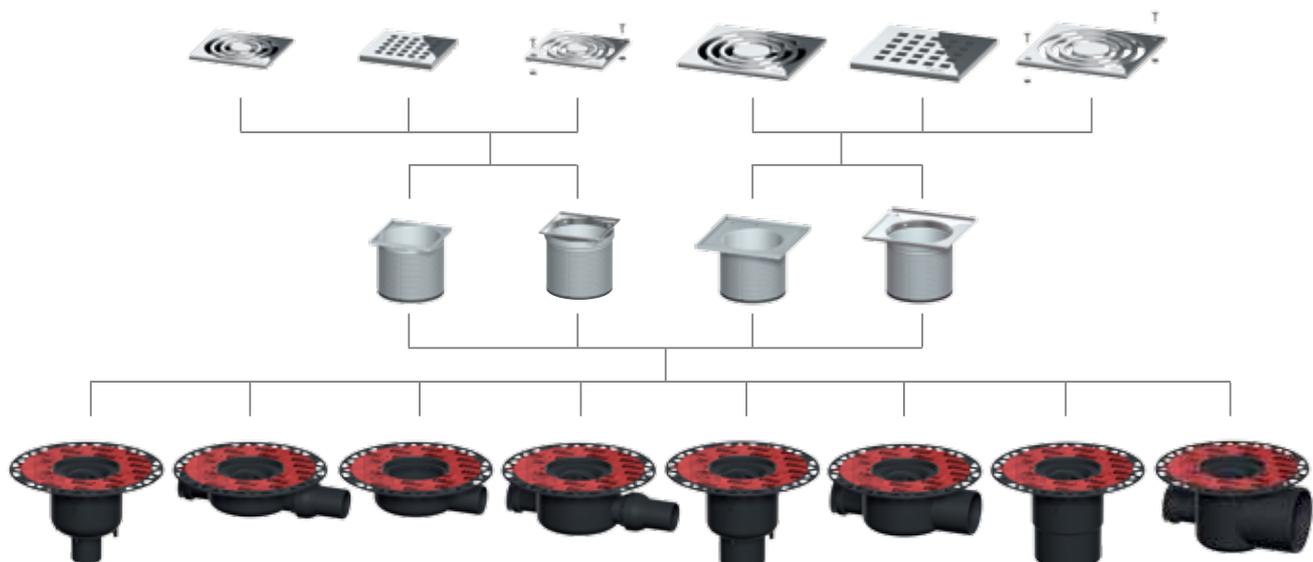

## TECEdrainpoint S modular system principle – compact, individual, versatile

### TECEdrainpoint S: The lean alternative to complicated "complete ranges".

The modular system – small range, infinite applications: put together your own drain from the modular system components. Select the drain, drain top, grate and accessories to meet your needs. Everything fits together and any combination is possible.

- Complete drains: it could not be easier. Four drain sets are available for the most common applications.
- Standardized Seal System universal flange. Just one flange design for liquid and strip composite seals or clamped flange connections.
- Certified seal safety through the Seal System.

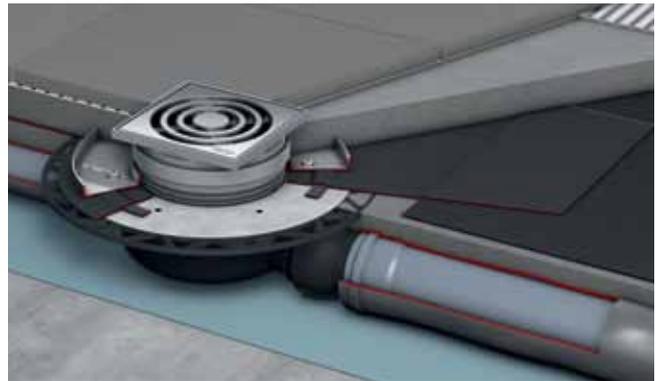

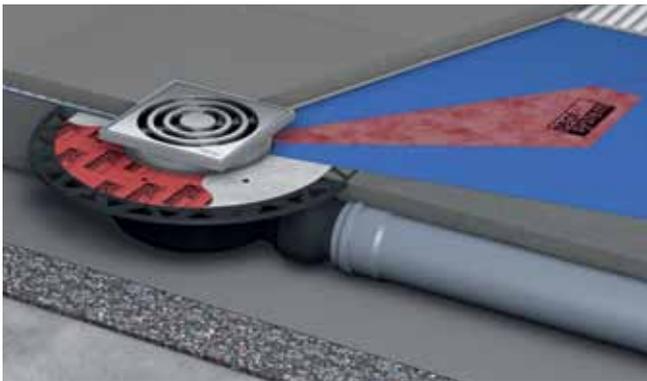

The compact range and the freedom to combine all drains, drain tops and other accessories allows the creation of individual drain solutions for practically any requirement.

# NEW! A universal flange for composite seals and clamped flange connections

## The Seal System universal flange

The Seal System universal flange allows the connection of two sealing variants with a single flange. Composite seals (A) or clamped flange connections (B) can be made, e.g. for the connection of bitumen membrane sheets.

## TECEdrainpoint S – modular system with method

A

B

C

### **It's all in the combination – the right solution for each application.**

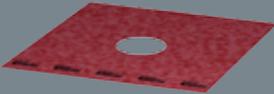

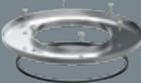

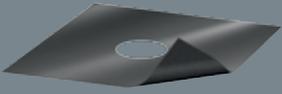

The TECEdrainpoint S drain bodies (C) are available with vertical or horizontal drain in three nominal widths; combined with a seal (B) and drain top with patterned grate (A), you already have a complete drain. For installation in a designed bathroom, the “quadratum” patterned grate, as well as grates with vandal-proof bolted connection are available. Extensions and other accessories round off the modular system. You can optionally order all odour traps as spare parts or replace an existing odour trap with the newly-developed two-stage membrane odour trap.

## Basic components

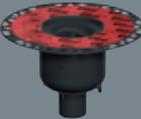

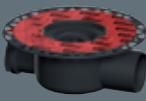

# A

	Drain tops including patterned grate			
	Plastic grate frame	Stainless steel grate frame		Stainless steel grate frame screw-down
100 mm	 366 00 01	 366 00 02	 366 00 07	 366 00 09
150 mm	 366 00 03	 366 00 04	 366 00 08	 366 00 10

# B

Sealing		
Seal System seal collar for composite seal (PP/PE)	Compression ring set for clamped flange connections (stainless steel)	Cut-to-size sealing foil EPDM 500 x 500 mm
 369 00 04	 369 00 03	 369 00 06

# C

	Drain body with Seal System universal flange			
	vertical	horizontal		
DN 50	 360 16 00	 360 14 00 <b>extra-flat</b> *	 360 14 01 <b>terrace</b>	 360 15 00
DN 70	 360 36 00	 360 35 00	* reduced sealing water height 30 mm	
DN 100	 360 76 00	 360 75 00		

## Accessories

	Stainless steel patterned grates	
	100 mm	142 mm
Loose	 366 50 02	 366 50 03
	 366 50 06	 366 50 09
Screw-down	 366 50 00	 366 50 01

Fire protection kits	
DN 50 fire protection kit	 366 00 50

Odour traps	
Two-stage membrane odour trap	 369 50 02

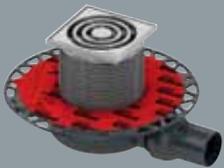

Extensions	
Raising element with Seal System universal flange (plastic)	 366 00 05
Extensions (plastic)	 366 00 06

Miscellaneous accessories	
Hair trap	 369 00 05
Assembly feet with sound protection cap	 369 00 07

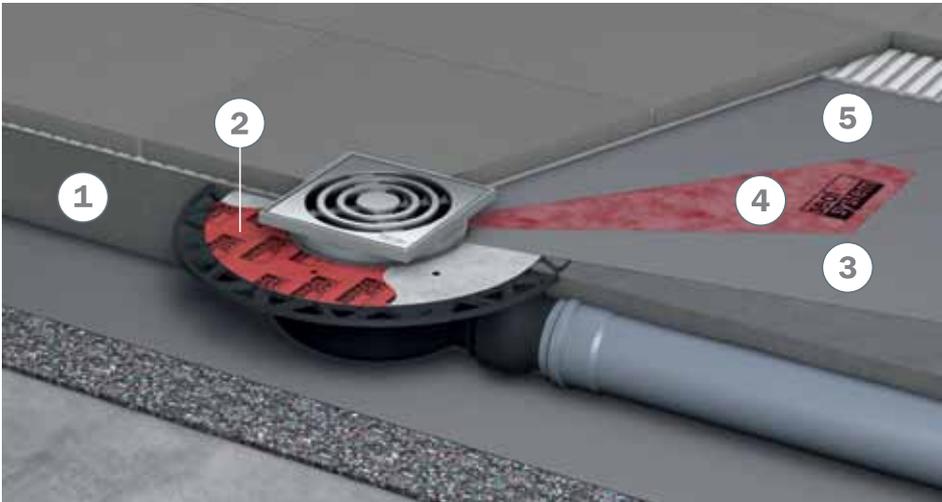

## Complete sets

**It could not be easier. Four complete drain sets are available for the most common applications.**

All drains have a DN 50 plastic (PP) drain body with removable odour trap and a drain top including a plastic (ABS) grate frame and O-ring seal. Supplied with TECEdrainpoint patterned grate made of drawn stainless steel, material 1.4301 (304), dimensions 100 x 100 mm polished finish, load class K3 (load of up to 300 kg).

Complete drain sets	
<p><b>TECEdrainpoint S 110 drain set extra-flat with Seal System universal flange</b></p> <ul style="list-style-type: none"> <li>■ With universal flange for the connection of composite seals or clamped flange connections</li> <li>■ With ball joint, lateral inflow DN 40, including plug</li> <li>■ Drainage capacity from 0.61 to 1.12 l/s</li> <li>■ Reduced sealing water height = 30 mm</li> </ul>	 360 11 00
<p><b>TECEdrainpoint S 120 drain set standard with Seal System universal flange</b></p> <ul style="list-style-type: none"> <li>■ With universal flange for the connection of composite seals or clamped flange connections</li> <li>■ With ball joint, lateral inflow DN 40 including plug</li> <li>■ Drainage capacity from 0.80 to 1.17 l/s</li> <li>■ Sealing water height = 50 mm in accordance with DIN EN 1253</li> </ul>	 360 12 00
<p><b>TECEdrainpoint S 130 drain set vertical with Seal System universal flange</b></p> <ul style="list-style-type: none"> <li>■ With universal flange for the connection of composite seals or clamped flange connections</li> <li>■ Drainage capacity from 1.36 to 1.52 l/s</li> <li>■ Sealing water height = 50 mm in accordance with DIN EN 1253</li> </ul>	 360 13 00
<p><b>TECEdrainpoint S 50 drain set extra-flat</b></p> <ul style="list-style-type: none"> <li>■ Drain body with retaining edge</li> <li>■ Drainage capacity from 0.81 to 1.12 l/s</li> <li>■ Reduced sealing water height = 30 mm</li> </ul>	 360 10 50

**Seal System – the new sealing standard for TECE drains and shower channels**

Example of the Seal System in a TECEdrainpoint S drain with a certified sealing product: (1) screed, (2) universal flange protective film, (3) first coat of composite seal, (4) Seal System sealing sleeve, (5) second coat of composite seal

**What is Seal System?**

With Seal System, TECE provides installers and tilers certified reliability in the connection of composite seals to TECEdrainpoint drains and TECEdrainline channels. The system is inspected by Kiwa TBU, an independent testing institution, and is based on the test principles required by the building inspectorate in Germany.

Fifty sealing products from renowned manufacturers have been successfully inspected and certified. The inspections covered the functional reliability (tightness) of the composite sealing products with TECE drainage products. A certificate may be obtained for every successfully inspected product.

A list of all certified composite seals may be retrieved from [www.sealsystem.net](http://www.sealsystem.net).

**Seal System comprises the following components for TECEdrainpoint S:**

1. TECEdrainpoint S drain with universal flange
2. Seal System seal collar
3. One of the 50 inspected and certified sealing products

# Small range, big advantage – point drainage made by TECE.

## **Point. Line. Sealed!**

The new 272-page standard reference work on certified composite sealing by Martin Krabbe, Reinhold P. Bäder et al.

Packed with information to help with the planning and installation of sealing systems in sanitary facilities, notes on the waterproofing of buildings and floor structures incorporating drainage solutions, more than 100 basic testing certificates issued by Kiwa TBU in Greven relating to point and linear drains and explanatory notes on the relevant standards.

At a price of just 36 euros including VAT from your bookshop (ISBN 978-3-00-040275-3).
