2020

Technical Specifications

Welcome to our new, improved Designer Collection technical brochure.

Helping your customers to choose the perfect Vitra bathroom is crucial. This new technical brochure to support our Designer Collection will assist you by putting vital information at your fingertips.

Based on market research in 2019, we've brought together all the key technical elements and essential details for each range in this brochure: code, price, cut-outs and technical drawings, complete measurements, compatible products and additional information. And to make life easier, we've colour coded the different product ranges and categories so you'll have no trouble navigating your way through recommending the right Vitra products to your customers.

This technical brochure complements the customers' Designer Collection brochure, brimming with inspiring design ideas so they can create a bathroom to match their lifestyle. Providing only the basic technical information in the consumer brochure will encourage the customer to seek more guidance from you.

Our most innovative products, including shower toilets, our new Aquacare toilets, our intelligent smart products and wall-hung frames, can be found in a dedicated section towards the back of the brochure. In addition, we have used colour tabs throughout to help you navigate between the different product categories.

To keep things simple, we've used icons throughout to identify features. You'll find a clear quick reference for these at the beginning of this brochure along with a useful matrix for furniture finishes and a dedicated section about all our innovation and product development.

Hopefully, having all this information in one easy-to-navigate brochure will make it easy to recommend the Vitra ranges (see page 11) to your customers and help them to design their new bathroom with confidence.

Icon guide

Sanitaryware Code Identification

A

Product code

The first part of the code defines the model of the product

B

Packaging specification code

B: In a box bearing Vitra logo
L: Loose product; without box

C

Special application code

0: Vitra Hygiene
4: Vitra Clean + Vitra Hygiene

D

Colour code

For example
01: Matt White
03: White
20: Matt Taupe
50: Matt Mink
70: Black
83: Matt Black

E

Technical specification code

Shows the technical features of the product. For instance the number of tap holes or bidet features.

Features

Water-saving WC

WCs marked with this symbol have a special bowl structure and are specifically designed to flush with both lower (2.5/4 litre) and typical (3/6 litre) water volumes.

By using less water, these water saving WCs benefit you and the environment. All Vitra standard height wall-hung frames come with dual flush function as standard in both 2.5/4 litre and 3/6 litre options.

Comfort height WC

These WC pans are taller than regular pans for added comfort and ease of use.

Fischer installation system

A simple, elegant installation system for use with wall-hung WCs. The fixings are hidden from sight by the use of internal ABS sleeves, creating a clean, smooth design.

Accessible

These products are wheelchair accessible and provide enhanced convenience in the bathroom.

Rim-ex™

Offering effortless cleaning and innovative, hygienic design. Vitra's rimless WC pan eliminates the areas where germs gather and multiply, giving a superior level of hygiene.

Water Regulations Advisort Scheme

Water Regulations Advisory Scheme Contributing to the protection of public health by preventing contamination of public water supplies and encouraging the efficient use of water by promoting and facilitating compliance with the Water Supply (Water Fittings) Regulations and Scottish Byelaws.

Product position

LSB = Left side basin RSB = Right side basin LHH = Left hand hinged RHH = Right hand hinged

Baths

VitrA innovation

We have listed some of the extra special ways VitrA invests in great product design to make the bathroom a safer, cleaner and better designed space.

VitrA Hygiene Coating Comes As Standard

A unique glazing process developed by VitrA that prevents germs from multiplying. The VitrA Hygiene glaze coats all external and internal surfaces before firing in a process that ensures lifetime VitrA Hygiene protection. VitrA Hygiene is applied to all VitrA products as standard.

Rim-ex WC pans

Rim-ex harnesses the latest in toilet bowl design. With a rimless, smooth internal pan that eliminates anywhere for germs and dirt to accumulate, the toilet that stays cleaner for longer and actively resists dirt build up.

Tests prove Rim-ex is 95% more hygienic than standard toilet pans* and it is much easier to clean – as there are no ledges you have complete visibility of the bowl. The unique design of the pan incorporates a water diverter to direct the flush around the bowl, which is easily removed for cleaning.

* Tests undertaken by the Akdeniz University, Turkey, show VitrA Rim-ex toilet pans are easier to clean and 95% more hygienic compared to standard toilet pans.

Shower Toilets for that just showered feeling

Our latest generation V-Care Smart Toilets (see page 266), combines the functionality of a toilet with the personal hygienic benefits of a bidet, fully customisable and remote-controlled to create the ultimate bathroom experience. The combination of being wall-hung and having a rimless Rim-ex bowl makes the toilet hygienic and easy to keep clean.

VitrA Aquacare (see page 268), with the uniquely designed, integrated air-breaker protects the household supply of drinking water from contamination, in accordance with the DIN EN1717 regulations, as well as the protection of a DVGW approval. Sold as a complete set, installing an Aquacare toilet is fast and simple. Aquacare is part of the Sento and M-Line collections and comes with a choice of either an integrated thermostatic stop valve or a non-thermostatic wall-mounted stop valve.

Smart Panel

As the digital home evolves, VitrA has combined smart technology with water-saving design in a modern and elegant flush plate that is compatible with VitrA 742 and 748 frames.

V-Box New Slimmer Design for Easy Installation

Introducing a new concealed part design for our shower systems. This new V-Box to be fitted at a minimum depth of 77mm, which is standard in the UK and the unit is compatible with our thermostatic shower mixers on page 208.

Striking Finishes

Physical Vapour Deposition (PVD) is a state-of-the-art manufacturing process in which metal powders are vaporised and deposited onto a surface. The metallic coating presents a striking finish and remains corrosion and scratch-resistant. Available on our Origin brassware and the Water Jewels basins.

VitrA Fresh For a Cleaner WC

VitrA Fresh is available in our M-Line series and features a built-in tank that dispenses detergent** with every flush, helping to keep the bathroom smelling fresh, the pan clean and protects against the build-up of bacteria. The removable lid allows for easy refill and cleaning.

VitrA Clean – special surface for extra hygiene benefits

VitrA Clean is a surface finish that makes VitrA sanitary ware products incredibly easy to clean. This special glazing process increases surface tension so the water flows easily from the surface. All that's needed to keep the basins clean is a wipe with a damp cloth and the use of a mild detergent, making cleaning easier and helping to keep your bathroom looking its best. VitrA Clean finish come as standard on the following products:

- Outline basins, see page 132
- Memoria basins and WC, see page 46
- Voyage basins, see page 14
- Equal basins and WC, see page 28
- Frame basins, see page 58

VitrA Infinit – an alternative to ceramic

A material manufactured by using a combination of natural stone powder and polyester resin, mineral cast produces a beautiful finish which is warm to the touch and easy to clean, it can also be used to create basins in a wide range of shapes and sizes. Mineral cast is a hard-wearing material with the added benefit of being invisibly repairable in the unlikely event of the basin becoming damaged. VitrA Infinit is a feature in the following ranges:

- M-Line Infinit, see page 84
- Memoria Infinit, see page 52

** The liquid detergent dispenser is safe to use with most commercially available non-abrasive toilet cleaning liquids which include hypochlorous cleaning agents and bleach of up to 12.5PH.

Reasons to recommend VitrA

Extensive choice of products

Offering ceramic sanitary ware, furniture, smart products, showers taps, bathtubs and accessories.

Finishing touches from the same range

Origin is available in four colour finishes Chrome, Brushed Nickel, Matt Black and Copper allowing you to style your whole bathroom using one range.

Commitment to Blue Life

By choosing a VitrA product you are contributing to saving the world's natural resources.

European Water Label supporter

With sustainability at our core, the vast majority of our products fall under the top water consumption band (Class A, using 5 litres or less of water).

VitrA Clean

A special glazing process that increases surface tension so the water flows easily from the surface.

VitrA Hygiene

A unique glazing process applied as standard to all our ceramic pieces developed by VitrA that prevents germs from multiplying.

Rim-ex

A rimless, smooth pan that eliminates anywhere for germs and dirt to accumulate the toilet stays cleaner for longer and actively resists dirt build-up.

Shower toilets

VitrA offers two styles of shower toilet: V-Care or Aquacare to meet all your shower toilet needs.

Designer Ranges

Created in collaboration with world-renowned designers, our exclusive ranges showcase the very best in bathroom design. In this brochure you will find full product listings and complete technical specifications for all of our designer bathroom ranges, taps and accessories.

Equal

The strength of this range comes from its simplicity and versatility. Elm or Patterned Black Oak furniture can be combined with basins available from 40cm to 130cm. Furniture units fit under the washbasins making it perfect for smaller spaces. Matching towel holders, shelving and mirrors provide a 3-in-1 solution. Equal balances crisp minimalism with great functionality.

Memoria Infinit

Memoria Infinit introduces an alternative to a ceramic finish; characterised by its simplicity, this range features washbasins and bathtubs made from Mineral Cast and the result is ultra-thin basin edges, designed to complement the slender High Gloss Grey and Chestnut furniture.

Frame

Frame contrasts rustic wooden furniture with smooth ceramics. The louvre effect provide a contrast to the ceramic. The ceramic countertop or inset basins are available in four colours including matt black, whilst monoblock and vanity basins are available in two colours. Washbasin units include the washbasin and start from 60cm up to 100cm, with the colours perfectly complementing each other.

M-Line

Designed in a simple and refreshingly open style, M-Line offers ultimate versatility. Within the furniture range there are four colour options, Gloss Dark Grey, High Gloss White and including the Grey Elm option, new for 2020, and furniture sizes which can work in many bathroom designs. M-Line is also part of our Aquacare range, a unique shower toilet solution, see page 268 for more information and check page 9 for Vitra Fresh, the WC with inbuilt cleaning.

Water Jewels

The Water Jewels collection offers something special for those with a contemporary taste. The striking colour finishes all come with a PVD coating (see page 9), ensuring the basins remain corrosion and scratch-resistant. Balancing simplistic design with intriguing textures and effects, The Water Jewels range brings drama in a way that is practical and durable, whilst giving your space an original identity.

Shower systems

Refresh and revitalise your bathroom with our range of stylish showers. Choose from a wide range of designs with thermostatic or manual options, exposed shower valves, hand showers (with and without slide rails), beautiful overhead shower heads and practical shower columns all with the design credentials synonymous with the Vitra brand.

Choosing your shower system	211
V-Box built-in shower mixers	213
Minibox built-in shower mixers	216
Flow diverter	220
Bath spouts	222
Hand showers & outlets	224
Showerheads	226
Connection pipes	227
Aquaheat shower kits	229
Shower mixers	231
Shower columns	232
Complete thermostatic shower solutions	235

Choosing your shower system

Choosing the right shower system is one of the most important aspects of bathroom design, especially given the wide variety of shower valves, handshowers and showerhead styles to choose from.

What is a shower valve?

The shower valve controls the flow of water, similar to the tap on a basin. There are two key considerations.

Firstly, shower valves can be either concealed behind the wall or exposed, typically a horizontal bar sits outside of the wall and contains all of the working parts.

Concealed shower valves

Locating the shower valve behind the wall creates a contemporary look, allows for more space under the showerhead and makes cleaning easy because the only visible part of a concealed shower valve is the control plate. For increased flexibility the concealed valves can also be placed on a wall away from the outlet (bathtub, handshower or showerhead) they are controlling. For instance the valve could be installed at the entrance to the shower on one wall, but the shower kit (slide rail, fixed head etc.) can be positioned within the shower enclosure on the opposite side.

Exposed shower valves

Unlike a concealed shower valve where the working parts are out of sight behind the wall, an exposed shower valve is ideal if you have solid brick wall that cannot accommodate a concealed shower valve or if you are looking for a quick, easy to fit solution.

The second consideration is whether you want the shower water temperature to be regulated. Thermostatic shower valves are designed to prevent fluctuations in the temperature of the water. This is an important safety consideration where extremes in water temperature can be dangerous.

Standard shower valves are non-thermostatic and do not regulate the water temperature, this means if a tap is turned on elsewhere in the property the water from the shower may run too hot or too cold.

Vitra offers a choice of concealed shower valves:

V-Box Thermostatic valve options only, see page 214

Aquaheat Thermostatic only, see page 231

Minibox Standard valve only, see page 216

Introducing V-Box

V-Box, by Vitra, is the new generation of concealed shower valve enabling 3 water outlets (bathtub, handshower or showerhead). V-Box can be trimmed to fit a 77mm wall depth which is standard in the UK and is compatible with our thermostatic shower mixers listed on page 214 & 215.

For the visible (exposed) part of the V-Box shower valve there is a choice of 3 styles; each with a full range of matching basin and bath fillers.

Water outlet options

1-way:

Shower mixer with adjustable water temperature control for either handshower or showerhead.

2-way:

Water can be diverted to two of the following options: handshower, showerhead or to the bath. Water temperature is adjusted using one controller and the hot and cold water feed separately into the concealed valve.

3-way:

Using a diverter, the water can be directed to either the handshower, showerhead or to the bath.

Diverter enable the flow of water to be switched from one outlet to another for example to the handshower or showerhead.

Installation

- 1

Impermeability Test
The water inlet pipes are fitted as shown above. Ensures the V-Box is mounted correctly and tightly to prevent leaks. There are also multiple fixing points.
- 2

Cleaning
After connecting the water feeds the special V-Box design also allows for any debris that may have accumulated from the installation process to be flushed out.

- 3

Gypsum Plate Wall Mount
Once the water inlet pipes are connected and cleaned, the box is fitted to the wall using the multiple fixing points. Special design enables easy mounting on gypsum plate walls.
- 4

Humidity Protection
To further protect the mechanism from humidity within the bathroom environment an insulating mattress is fitted. Additional sealing cuff protects the wall from humidity. After tiling is completed, the front of the box is trimmed to the correct depth and the appropriate plate can be fitted.

Choosing the right shower system with V-Box

Whether you are looking for a square or round contemporary design, there is a range suitable for any bathroom setting.

After the tiling is completed the front of the box is trimmed to the correct depth and the appropriate brassware is then fitted.

V-Box can be used with one, two or three-way outlets. Within the compatible ranges there are bath mixers and thermostatic bath/shower mixers and diverters. V-Box can be used with Origin, Suit and Minimax S exposed parts, providing choice for consumers. All exposed parts, including the handles are made of metal.

Smart toilets, flush plates & frames

Our latest generation of V-Care smart toilets combine smart technology with the functionality of a toilet with the personal hygiene benefits of a bidet. Our Aquacare shower toilet benefits from an integrated and mechanically operated bidet function, as well as complete ease of installation, and our flush plates offer a modern alternative to a traditional handle or lever-based flushing mechanism. They release exactly the right quantity of water, helping to monitor and conserve usage in one simple action.

Our frame systems are crucial to any modern bathroom, supporting and holding wall-hung toilets firmly in place. Frames are available in standard and reduced height, to give the freedom to create a stunning room without the need for expensive structural building work.

V-Care	266
Smart panels	267
Aquacare	268
Flush plates	272
Frames and Concealed cisterns	276

V-Care Smart Toilet Comfort

The streamlined Smart Comfort remote control enables you to use the extensive range of features all at the touch of a button, including seat opening and closing, adjustable spray, water temperature and drying options.

The design features concealed plumbing and electronic connections for easy installation and has a focus on hygiene due to it's easy to clean innovative rimless Rim-ex toilet bowl.

Features and benefits:

- Oscillating and pulsating jet options
- Multiple washing options
- Self-cleaning jet nozzle
- Adjustable drying temperature
- 5 toilet seat temperatures
- Remote seat opening and closing
- Automatic air purification for a fresher bathroom
- Bespoke gender-specific washing options
- De-calcification feature to prevent limescale
- Energy-saving mode
- 2 year guarantee

Smart Panel

Using the latest digital sensor technology we've created the most hygienic and efficient toilet flush available.

As the digital home evolves, Vitra has combined smart technology with water-saving design in a modern and elegant flush plate that is compatible with Vitra's wall-hung frames.

V-Care Smart Panel app

The Smart Panel system can be synced to the owner's mobile phone through Vitra's app, allowing the user to flush and view usage data for their toilet remotely. The app's regular reporting allows households to see their weekly water usage and identify how they can be more efficient. It also relays local water, power and drainage announcements to aid better management of flushing systems.

Flush with success

Vitra's Smart Panel has three flushing options - a full flush, half flush and a periodic flush - allowing the user to have control over water usage. Designed with hygiene in mind, the new periodic flush mode can be set to regularly wash out the bowl, minimising the risk of dirt and stains accumulating, keeping waste pipes clean. An auto-flush mode is also available, supplying the optimum volume of water according to each flush.

Family-friendly features

For families, the smart flush plate can be locked as a safety precaution for children.

Aquacare shower toilet

Developed by the VitrA Design and Innovation Team, Aquacare is a bidet and toilet in one, offering a refreshing, clean and hygienic bathroom experience. No electrical connections are required as the water is controlled via standard plumbing methods.

Available in the Sento and M-Line ranges, the toilets feature soft-closing seats and our hygienic Rim-ex bowl (see page 8). Also available with a Vitrus glass concealed cistern (see page 286). When installing an Aquacare WC there is no additional equipment or preparation required for installation.

Increased hygiene

The bidet receives water from the mains supply and the non-return valve features an air break to prevent contaminated water from the pan travelling back through the system, thus increasing the level of hygiene. Fully compatible with the EN1717 regulation which protects against the pollution of drinking water.

Beautifully designed

The Aquacare technology is hidden within the pan so it looks like a regular toilet and will integrate with any bathroom design. A soft-close seat is included with all models and includes our Rim-ex™ bowl, with no hidden rim for a more hygienic toilet that is easier to clean and stays cleaner for longer.

Thermostatic control

The M-Line Aquacare toilet offers a thermostatic feature to ensure a consistent water temperature, to a maximum of 38° to prevent scalding. This is controlled via a stop valve mounted on the side of the toilet.

Features and benefits

- Three models available:
- Sento Aquacare
 - M-Line Aquacare
 - M-Line Aquacare with integrated thermostatic stop valve
- Wall-hung
 - Rim-ex™ toilet bowl
 - Soft-close seat
 - Backflow prevention
 - Single bidet spray cleaning function
 - Simple to install

Quick and easy to install

Aquacare comes as a complete set. Included is a toilet with a pre-assembled and integrated air breaker and a soft-closing seat. No additional equipment or preparations besides water installation are required.

If maintenance is required, access is easy. One simple click removes the Aquacare cover located below the toilet seat.

Frames and Concealed cisterns

Eliminate the unsightly mess of cisterns, pipes, u-bends and other functional elements that spoil the look and ambience of your bathroom, by installing a wall-hung frame.

Install with confidence

Aside from a much tidier look, there are lots of practical benefits to using our wall-hung frames

Hygienic

Keeping a bathroom clean is so much easier with a wall-hung WC. All pipework, usually a haven for dust, is completely concealed, and with the WC pan fixed above the floor, it's so much easier to keep the floor clean.

Quiet

Not only is the cistern concealed behind a wall, but it's also manufactured with a specially-engineered fill valve, and lined with insulating styrofoam to keep filling noise to an absolute minimum.

Easy Access

The flush plate can be removed easily, providing easy access to internal fittings. Flush plates have a 5-year guarantee.

Space-Saving

A wall-hung WC takes up less room than a conventional WC, providing greater flexibility where space is at a premium. In addition, the tidier arrangement, with more available floor space, also creates the impression of a larger bathroom.

Quick & Easy Installation

An intuitive design makes installation quick and easy – a real advantage, particularly when carrying out multiple installations.

Water-Saving

The dual-flush action for both the slim and the regular wall-hung frame operates at 2.5/4 litre or 3/6 litre, resulting in as much as 70% reduced water consumption, benefiting both you and the environment.

Quality and assurance

All our wall-hung frames are subjected to rigorous reliability and performance testing.

Overflow

An overflow pipe located within the valve acts as a safety device. Overflow pipes are tested to ensure they can cope even in high water pressure areas.

Strength & Stability

Wall-hung WC pans and their concealed frames are designed to be able to support up to 400kg.

Durability

Our products are periodically tested for durability according to international standards. To pass this testing, every single component must still be functioning perfectly after 200,000 consecutive operations.

Leak Detection

Every cistern we manufacture is individually tested to ensure it is 100% watertight.

Flow Rate

A wall-hung WC takes up less room than a conventional WC, providing greater flexibility where space is at a premium. In addition, the tidier arrangement, with more available floor space, also creates the impression of a larger bathroom.

Performance

All products are subjected to rigorous testing at our production facilities to ensure that they function perfectly before passing quality control.

Specific design features

- 1 Flush plate**
The flush plate operates the cistern. It enables easy operation of the wall-hung frame and covers internal parts that remain in the wall.
- 2 Body**
The filling and flushing valves are located in this part of the cistern. Produced from polyethylene (HDPE) raw materials, it offers more safety with its flexibility and resilience.
- 3 Filling valve**
The filling valve is the system that fills the cistern with water. The filling valve is checked in Vitra labs for "water-tightness" via accelerated life testing 200,000 times. The filters above the filling valve eliminate the risk of clogging, ensuring durability and a long lifetime. New Vitra filling systems ensure fast and silent filling.

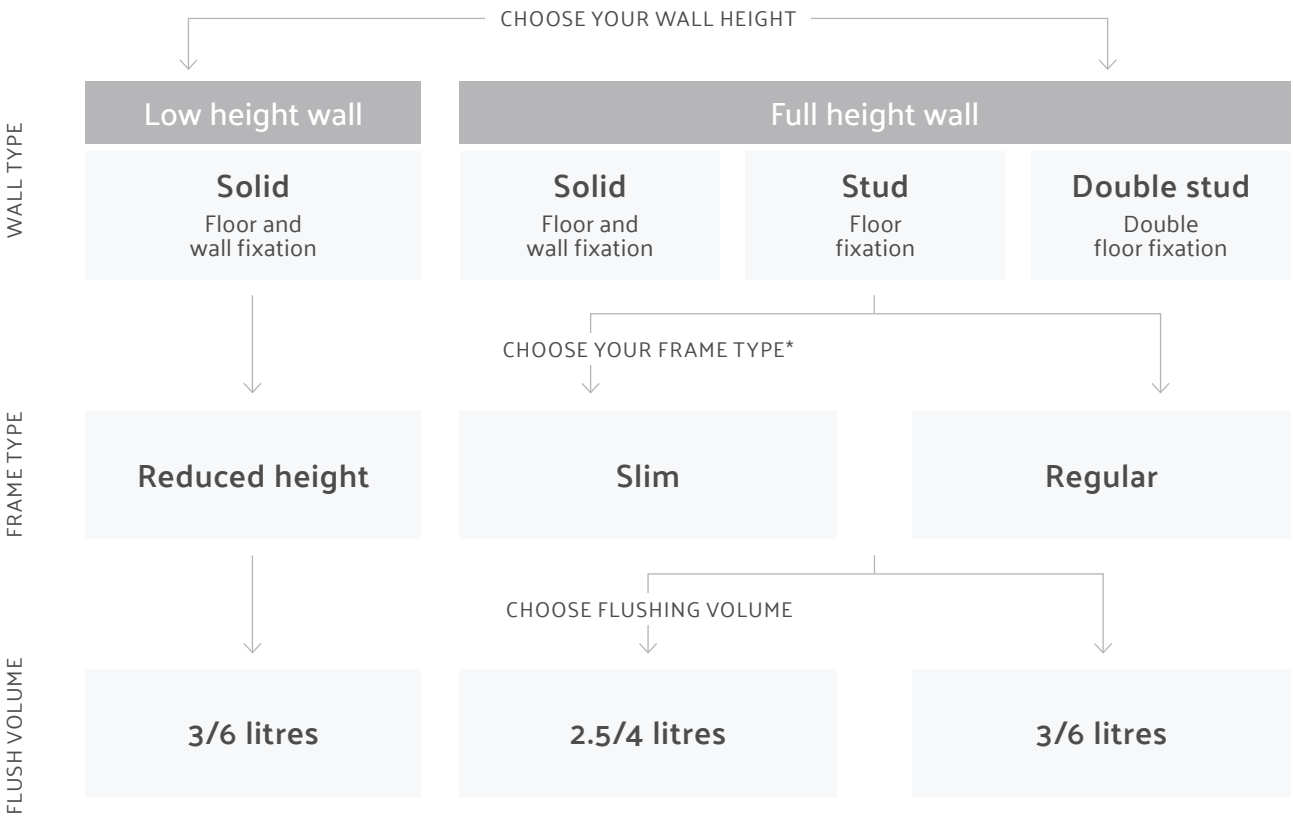

- 4 Overflow pipe**
When too much water enters the cistern, the overflow pipe in the flushing mechanism channels the excess water into the WC pan, preventing the risk of flooding.
- 5 Metal stand**
For Metal feet enable the easy adjustment of height from the floor and provide fixing points.
- 6 Flushing valve**
The flushing valve transfers the water in the cistern to the WC pan. For correct and reliable functioning, flushing units are subjected to 200,000 watertightness and accelerated life tests at the factory.

- 7 Body styrofoam**
The styrofoam coats the entire lower body and prevents condensation forming in the cistern and provides sound insulation.
- 8 Panel gap**
The panel gap on the body is designed to provide optimum opening space for the maintenance of the filling or flushing units and enabling easy access to the cistern. The size of this gap is very important for servicing purposes.
- 9 Intermediary hose**
The intermediary hose that connects to the water piping inside the cistern can isolate the water flow during service-oriented interventions, and enables easy replacement of parts.

Frames

Vitra's frame systems are crucial in supporting and holding our wall-hung toilets firmly in place without the need for expensive structural building work.

Whatever your requirements, Vitra's range of frames offers you complete flexibility. The reduced height frame is perfect when space is at a premium or the room has a sloping roof or low window. Both the slim and regular sized frames can be used in solid, stud and double stud wall scenarios and are both available with a choice of flushing volumes.

*Check against our full range of wall-hung frames for WCs, urinals, bidets and washbasins at vitra.co.uk

Need an alternative to a wall-hung frame? Our Vitrus glass concealed cisterns (page 286) for wall-hung and back-to-wall WCs can be used with any wall type, removing the need to create a false wall to hide the frame.

Sustainability & accreditations

We're driven by our commitment to a sustainable future and the efficient use of water is one of our top priorities. We recognise our responsibility as a leading manufacturer of bathroom products to spearhead the water-saving movement having achieved the target set of reducing our own water consumption by 4% between 2017 and 2020.

We are also devoted to developing products and technologies that enable our customers to save water in their own homes. From aerators to eco-friendly cartridges, our innovative water-saving features mean you can save water while not compromising on design.

The European Water Label

The European Water Label is a government initiative put in place to empower consumers with important information on the water and energy use of bathroom products.

With sustainability at our core, the vast majority of our products fall under the top water consumption band (Class A, using 5 litres or less of water).

WRAS

WRAS (Water Regulations Advisory Scheme) has been approved as compliant with the Water Supply (Water Fittings) Regulations and Scottish Byelaws. All WRAS-approved products undergo rigorous mechanical and water quality testing that ensures the product will keep water supply clean and free from contamination.

To see the full list of our WRAS-approved products, please visit vitra.co.uk/about-us/sustainability

Adjustable cartridges

Some of our mixers come with adjustable cartridges that limit the maximum heat and flow from the tap, which in turn can save up to 60% waste. Our water- and energy-saving products are marked throughout with these symbols.

Aerators

Aerators sit at the end of taps and add streams of air into the water flow. Water-saving and energy-saving, aerators significantly reduce the amount of water used while maintaining high water pressure. By directing water into one single downward flow, aerators also create a smoother flow and reduce splashing. Our ranges with aerators are marked throughout with the following symbols.

Our water-saving aerators use significantly less water while maintaining a strong flow of 5 litres per minute.

Our swivel aerators allow you to change the direction of the water flow easily, meaning you can reach all areas of the washbasin.

Our coin-slot aerators can be effortlessly removed with the use of a coin, making it easy to clean the threaded aerator.

Water pressures

Water pressure, measured in bars, describes the strength of water flow through a pipe. When choosing your bathroom brassware, it's important to understand the water pressure in your water plumbing system. Whether it's a gravity, combination boiler, pump-assisted or mains high pressure system (ask your installer if you're unsure), identifying your system is key to finding a product that will give the best possible performance.

The minimum water pressure requirements for each product (low, medium or high) are marked in the brochure. Most products will suit any water system, however, the high pressure products are designed to work with high pressure systems for maximum pressure. Equally, if you have low water pressure, there are lots of products that will work for you.

Blue Life

Evolution stems from being adaptable to change. As the climate and the needs of our clients change, our ethos as a company evolves. In 2017, we initiated Blue Life, our pledge to greener production.

Since the Blue Life initiative began, we are now using 35% less water than before and have reduced energy consumption in our ceramic kilns factory by 15%. But this is just the beginning of what we are striving for.

We are taking this initiative to our products. Our 2.5/4ltr WC pan has been engineered to use up to 60% less water per flush than a standard design and our brassware is manufactured with adjustable pins for you to have control over water usage.

By choosing a Vitra product, you are contributing to saving the world's natural resources.

Our pledge to the future

- Continue the use of non-renewable resources in the production process.
- Develop products that promote power and resource conservation.
- Make significant investments towards boosting eco-efficiency.

Guarantees

Furniture and mirrors	2 years	Wall-hung frames and concealed cisterns	5 years [†]
Sanitaryware	10 years	Acrylic baths	25 years
Toilet seats	2 years	Bath panels	2 years
